EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Fichter on July 18, 2004.

The application has been amended as follows:

Please cancel claim 7.

Please replace the existing abstract with the following:

ABSTRACT

The present invention relates to an organic-inorganic hybrid film material consisting of polyamide and either polysilsesquioxane or silicon alkoxide and to a process for producing the organic-inorganic hybrid film material. The present process can effectively reduce the phase separation and can produce an organic-inorganic hybrid film material having 0-100% organic content. The present process can control desired properties of the resultant hybrid film material by adjusting the ratio of the organic and inorganic material, such as refractive index, birefractive index, dielectric index, and flatness of the film. Also, the present organic-inorganic hybrid film material

possesses excellent heat-resistivity and is suitable for an IC process requiring high processing temperature.

The Examiner informed Applicant that the earlier indication that claim 7 was allowable had been erroneous insofar as claim 7 was a product-by-process claim and, therefore, did not have to be obtained from the same method(s) as are outlined in claims 1-6. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process" *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). The Examiner pointed out in the correspondence dated March 31, 2005 that comparative example 3 disclosed in JP 4-189866 would seem to teach a method that is quite similar to that presently claimed but does not, nonetheless, render obvious the claimed invention because several minor aspects of the instant method are not contemplated. (A couple of the disparities in the instant- and prior art methods is outlined in the March 31 Office action.) As such, it would undoubtedly provide the same product as is claimed in claim 7.

Applicant authorized the cancellation of this claim on July 21, 2005

The abstract was amended so as to bring it in conformance with the rule that states that it shall be no more than one paragraph.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figure 3 contains print so small as to be illegible and the white drawings on black background in figure 5 cannot be properly viewed. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

An updated survey of the prior art did not yield a reference more germane than those already cited. Accordingly, claims 1-6 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
